

## Creating and editing your "Band" user.

In order to author music, you must create a Phicno account and set your account as a "Band" or as a "Musician." When you 1<sup>st</sup> sign up for an account, you will automatically be setup as a "Fan." When you edit your profile, you will be able to update this "User Type" revealing some necessary and/or important configurations for Authoring Albums and Marketing to your fans.

• From the main nav, click on My Account and "Edit Profile"

• Your first task should be to upload an Avatar image, update your "Introduction" and decide whether you want a different "Screen Name" than that of your login (upon registration, these are one and the same).

Note: The Avatar image and Introduction are not necessary to complete, but they will be used in the following [marketing] sections of the site:

- the intro interface to each of your albums
- o your personal homepage
- $\circ$   $\;$  the message window when a fan is trying to contact you through the site
- $\circ$  the "Get Connected" section; this is our version of LinkedIn for Indie artists
- If you choose to "sell" merchandise at any point, you will need to enter a "Paypal Email." We use this email to distribute your sales revenue at the beginning of each month.

Note: You do not need to worry about this step now. If you, later, attempt to activate merchandise, and you have not set this field, you will be notified at that time.

### Editing Band/Musician Details.

When you update your User Type, you will then be able to update your Band- or Musicianspecific Details.

## **Band User Type**

- A band is made up of multiple musicians, each of which plays 1 or more instruments in the band. In order to expedite getting your band up and running, you can easily add "Create New Musicians" from right in the Band profile page. These musicians are automatically "assigned to this band"
  - Each New Musician must have a unique login, but can share the same password.
  - The email address assigned to each musician will be the same as for the band.
  - Each musician will, eventually, want to login to their respective accounts and configure their own profile with their own Avatar, Introduction, screenname, email, login, password, social URLs and, most importantly, primary and secondary instruments.
  - If the musician plays in additional bands that exist on Phicno, they can assign themselves to those bands as well.
- The "Members" information is really important to configure, as it appears on the cover page of your album below the image of your album cover.

Note: This configuration of Band Members is *different* from "Musical Contributions" which happens on an individual song basis during the Album(s) authoring process... but the list of available, assigned musicians is the same for both tasks.

• For marketing purposes, it's also a good idea to enter in your Social URLs, as those will appear in all the same sections as your Avatar image and Introduction and will give your fans easy access to all of your Social postings.

Note: For your social links to work, only copy/paste the "ID" part of the URL... and don't worry, this is just for your fans' use; we do not access or leverage your social sites in any way, and if we someday decided to do so, you would be required to give us a release for that before we did anything.

### **Musician User Type**

Musicians can use their accounts for two purposes: self-promotion (your own bio, social URLs, merchandise, message center, solo albums, etc.,) and Assignment to Band(s).

The cool thing is that, if you are a member of multiple bands, all the albums that you play on will also show up in your homepage.

• The basics of a profile are the same between all user types: avatar, introduction, screenname, paypal email for merchandise, etc., however, there are some unique Musician Details that should be configured for self-marketing and promotion.

- The following are some key configurations that are worth mentioning:
  - Primary Instrument: This is what is used in all search queries (i.e., how you would like fans to find you)
  - Other Instruments: The plan is for this information to be used in your homepage bio.
  - My Bands: This is where you can assign yourself to any Bands registered on the site (i.e., this allows bands to assign you to an album and credit your contribution)
- As was the case with Bands, Musician have their own set of social URLs that can be setup for marketing purposes. These will appear in your individual homepage to give your fans easy access to all of your Social postings.

## Adding a New Album

-

The next step is to start authoring your albums which can be done by both "Bands" and "Musicians." The difference between the two is that Bands configure Instrument/Musician assignments to the album and individual songs, whereas Musicians simply configure the "Instruments Played" on the album and individual songs.

The process begins with adding your first "Collection." A collection is simply a way of grouping albums together (e.g., "Studio Albums," "Live Albums," etc.,)

• From the main nav, click on Author Tools/Music

- 1. Add at least one Genre (keywords are optional)
- 2. Upload a cover image
- 3. Upload a backcover image
- 4. Upload at least one song
